Bulma Bootstrap CURL

Symfony

AWS S3 Glacier EC2

Pusher.io Git Linux Apache

Nginx MariaDb MySQL

# MATT RADEMACHER

## Software Developer

Jan 2009 - present

## Coveted Clothing

<https://covetedclothing.com>

- Created and maintained a web panel which allowed our four member operations staff to manage over 50,000 products, 15,000 SKUs and 100 sales daily, features included:
  - payment processing with PayPal Pro's REST API
  - shipping address validation with the ShipEngine REST API
  - order / product sync across many sales channels using GraphQL, REST and CURL
  - product photo management with AWS S3 and Glacier
  - built on a Laravel Framework backend with a Vue.js frontend
- Hired and managed a general I.T. support staff member to implement and assist in all warehouse I.T. operations.

## Owner

Nov 2006 - present

## Bella B

<https://bellab.com>

- General problem solving related to starting and growing a small business.
- I.T. guidance and assistance including Shopify theme development, OpenCart development and REST API integrations.
- After many years in business I'm proud to state that Bella B has become a staple of the downtown experience and currently employs six full and part time local college and high school students.

## Owner

June 2005 - March 2009

## Cayman Marketing

Online Marketing Company

Utilized HTML/CSS/JS and PHP to create competitive advantages resulting in upwards of 20,000 actions (lead or subscription) and \$75,000 in direct sales per month for companies like MusiciansFriend.com and eFaucets.com.

## Systems Engineer

Feb 2003 - June 2005

## Lazer Technical

IT Consulting Company

- Provided professional services in support of EMC hardware for Kaiser Permanente, Farmers Insurance and Zurich Financial Services.
- Installed, monitored and optimized AIX Server backups and assisted in data center consolidations.
