- Program Architecture
- RESTful & GraphQl APIs
- Object Oriented Design
- Test Driven Development

Specific Tech

PHP TypeScript Go

Javascript ES6+ Node.js

HTML CSS

React Vuejs Laravel

React-Native Vuex Vuetify

Vue-Router LoDash Bulma

Bootstrap CURL Symfony

AWS LAMBDA S3 Glacier

EC2 Pusher.io Git Linux

Apache Nginx SQL

NOSQL

Senior Software Engineer — Gartner
Feb 2020 - Present — *Gartner Digital Markets*

- Designed and implemented a RESTful API to wrap legacy code up behind a clean interface for consumption across multiple internal projects.
  - Set up a structured design which included highly testable, mockable repositories accessed through a service container.
  - Ensured continued code design integrity through thoughtful code reviews and team communications.
- Instituted several coding and API standards to promote a better team workflow and increase productivity.

Software Developer - Owner — Coveted Clothing
Jan 2009 - Jan 2020 — *https://covetedclothing.com*

- Created and maintained a web panel which allowed our four member operations staff to manage over 50,000 products, 15,000 SKUs and 100 sales daily, features included:
  - payment processing with PayPal Pro's REST API
  - shipping address validation with the ShipEngine REST API
  - order / product sync across many sales channels using GraphQl, REST and CURL
  - product photo management with AWS S3 and Glacier
  - built on a Laravel Framework backend with a Vue.js frontend
- Hired and managed a general I.T. support staff member to implement and assist in all warehouse I.T. operations.

Owner — Bella B
Nov 2006 - March 2020 — *https://bellab.com*

- General problem solving related to starting and growing a small business.
- I.T. guidance and assistance including Shopify theme development, OpenCart development and REST API integrations.
- After many years in business I'm proud to state that Bella B has become a staple of the downtown experience and currently employs six full and part time local college and high school students.

Owner — Cayman Marketing
June 2005 - March 2009 — *Online Marketing Company*

Utilized HTML/CSS/JS and PHP to create competitive advantages resulting in upwards of 20,000 actions (lead or subscription) and $75,000 in direct sales per month for companies like MusiciansFriend.com and eFaucets.com.
